

Rapid COVID-19 testing - a guide for parents

General Information

About 1 in 3 people who have COVID-19 do not have symptoms, so do not know they have it. This means they can infect others unknowingly.

Rapid Lateral Flow Device (LFT) testing is a fast and simple way to test people who **do not** have symptoms of COVID-19 but may still have the virus. Rapid lateral flow tests **should not** be used by anyone who has COVID-19 symptoms.

If your child is isolating as a close contact of someone who has COVID-19, they should not take an LFT during the isolation period. If your child displays any symptoms of COVID-19 they should get a Polymerase Chain Reaction (PCR) test.

Primary school-age children and younger do not need to test with LFT. If they have COVID-19 symptoms a PCR test should be booked for them.

You and your household should report the result every time you use a rapid lateral flow test kit, even if the result is negative. Report your result by visiting www.gov.uk/report-covid19-result or by calling **119**.

The Lateral Flow Test is negative, what do I do next?

For those who return a negative COVID-19 lateral flow test result, they do not need to self-isolate unless:

- They are symptomatic (they'll need to book a PCR test)
- Someone they live with tests positive/has symptoms
- They've been traced as a contact of someone who tested positive/has symptoms

The LFT test result is positive, what do I do next?

If a member of your household tests positive using a LFT, your household should start self-isolation immediately for 10 days. You should also book a confirmatory PCR test immediately and an appointment should be within two days.

A home PCR test can be booked online at www.gov.uk/get-coronavirus-test or by calling 119. Further details on how to book a PCR test at one of our test sites at the Dairy Car Park or Billingham Forum Car Park can be found at www.stockton.gov.uk/testing.

The PCR test result is negative, what do I do next?

If the PCR test is negative, your household can end self-isolation.

What does self-isolation mean?

- You must stay in your home and garden.
- You can not leave your property unless it is to attend your PCR test appointment.
- You can not have visitors inside your home or garden.

Can I get a Home Test Kit?

Anyone in England who does not have symptoms can now get regular rapid lateral flow tests to check for COVID-19. These can be ordered online from www.gov.uk/order-coronavirus-rapid-lateral-flow-tests. You can alternatively pick up a home test kit from community collect sites or any rapid lateral flow test site: www.stockton.gov.uk/coronavirus/testing.

What should I do if I develop symptoms, and they get worse?

If you develop symptoms of COVID-19, and they get worse use the **111** online Coronavirus service at www.111.nhs.uk/covid-19 or **call 111**. If you can't get through to 111, call your GP Practice who can refer you to a specialist COVID clinic in Stockton-on-Tees.

What support is available?

COVID Community Support Team

If you need to isolate as a result of a positive test, The COVID Community Support Team can support you with food deliveries, shopping, picking up prescriptions or making sure people who are self-isolating and may be worried or lonely get the support they need. The team can be contacted on **01642 733906**, between 9am and 12noon, Monday to Friday or email covidcommunitysupport@catalyststockton.org.

Financial Support

There is a lot of support available if you are struggling financially as a result of the COVID-19 pandemic including Council Tax support and Test and Trace Support payments. To apply for a Test and Trace Support payment **visit www.stockton.gov.uk/TTsupport**. Further information on the support available can be found at www.stockton.gov.uk/coronavirus

COVID-19 Public Health Advice

If you are unsure if you need to isolate or concerned about an outbreak of COVID-19 get in touch with Public Health on **01642 528474**.

To help reduce the spread of COVID-19
always remember:

Wash your hands
regularly with soap
and water

Wear a face
covering

Keep two metres
apart from people
you don't live with
or aren't in your
support bubble

Let fresh air in to
indoor spaces
